COVID-19 ADAPTATIONS

- Face-to-face delivery, with PPE and testing
- Live virtual delivery, with activities and opportunities for discussion
- Our BRAVE films, worksheets and resource packs
- Highly flexible to ensure as wide a reach as possible

I've been shown many similar videos, workshops and even movies that try to explain the causes and impacts. This video by BRAVE stands out because you guys really picked apart why some of us younger get caught up in these situations in the first place.

She made me feel I wasn't alone, and that with help I can come out of this place I am in.

I learnt about grooming. I went to talk to my Mum and we talked about ways I might be vulnerable and what I can do to make sure I stay safe.

It put extremism and gangs into perspective on a level that makes sense to us.

I would love to take part in it again as the information was mind blowing. The delivery was on point and I wanted to learn more.

Really impressive facilitators, speakers and interactive presentation. Very engaging topics, the manner in which it was presented with both reflective elements and practical advice and support for working with young people.

The expert by experience account was incredibly brave and moving - important for practitioners to momentarily walk in someone's shoes and see another perspective.

**All content was delivered impeccably.
Very informative**

Trainers knowledge was brilliant and insightful. Gained a lot of new understandings around both topics. Getting to hear an individual's personal story was also very powerful.

Trainer knowledge was fantastic. The training was extremely in depth and content covered huge amounts. I have taken a lot away from this training.

Excellent, fast paced delivery. Really useful thinking about how narratives can be used to improve critical thinking in young people; helpful to think about how to take apart the 'pitch' they may have received - importance of having arguments ready in terms of combatting extremism and extremist arguments; very helpful to fully understand the mindset and reality of people working in the drug trade.
